

269 Series

Surface Skimmer

Function:

The **269 Series Front Access Surface Skimmer** is used to remove film and debris from the fountain's water surface.

This series of skimmers is similar to the 268 Series, but is smaller and is typically used only when the pool wall is too thin for proper installation of the 268 Series. The nominal required flow is 5 to 25 GPM. The skimmer has a 1-1/2" slip PVC pipe connection.

An internal floating weir insures good suction force at the water's surface to move debris, which collects in the front-removable basket.

Key Features:

- White or black cyclac plastic construction.
- White plastic, black plastic, natural brass, or chrome finish faceplate available.
- Front-removable basket for cleaning.
- Includes: Diverter Plate, Trim Plate, Mounting Plate, Gasket, and Screws.

#269-112 Surface Skimmer: Black cyclac construction. Black cyclac plastic faceplate.

#269-113 Surface Skimmer: Same as #269-112, except with natural finish brass faceplate.

#269-114 Surface Skimmer: Same as #269-112, except with stainless steel faceplate.

#269-115 Surface Skimmer: White cyclac construction. White cyclac plastic faceplate.

#269-116 Surface Skimmer: Same as #269-115, except with natural finish brass faceplate.

#269-117 Surface Skimmer: Same as #269-115, except with stainless steel faceplate.
